DETAILED ACTION

Lack of Unity

1. Claims 1-14 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7 drawn to a catalyst and a process for producing the said catalyst.

Group II, claims 8-13, drawn to a process for producing a both end-hydroxyl group-terminated diol.

Group III, claim 14, drawn to a both end-hydroxyl group-terminated diol product.

The inventions listed as Groups I through III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention(s) of Group I is drawn to a catalyst and a process for producing the said catalyst and the invention of Group II is drawn to a process for producing a both end-hydroxyl group-terminated diol. There is no special technical feature that unites Group I with Group II because the invention of Group II does not require the particulars of Group I in that both end-hydroxyl group-terminated diols are produced by other and materially different processes (eg., via the hydrogenation of the 3-hydroxypropanal intermediate or

hydrogenolysis of a 1,2-epoxyalkane; see JP 10212253 and German Patent no. 1,139,447). The invention of Group III is drawn to a both end-hydroxyl group-terminated diol product, which may be produced by process of Group II. There is no special technical feature that unites Group III with either Group I or II. Groups III does not require the particulars of Group I or II because it is well know in the art that both end-hydroxyl group-terminated diol products can be produced by a number of other and materially different processes such as those disclosed in Japanese patent no. 10212253 and German Patent no. 1,139,447.

A telephone call was made to Sheldon Landsman on 5/29/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elvis O. Price whose telephone number is 703 605-1204. The examiner can normally be reached on 8:30 am to 5:00 pm; Mon-Fri.
